SUNDAY	Long Run / Big Day Hike	Rest

SESSIONS PER WEEK

Gym x 3	Run x 5/6	Cross x 4	Rest x 2
---------	-----------	-----------	----------

Training Principles

This training split is designed to build a powerful engine, strong legs, full-body strength, and unstoppable hybrid conditioning.

Gym

- 50–60 minute sessions focused on 3–4 major lifts and 2 accessory exercises.
- Perform 3–5 sets of 8–12 reps using heavy weight.

Running

- Easy runs are kept in Zone 2. Focus on efficient technique, light footstrike, and high cadence.
- Tempo runs are controlled efforts just below threshold.
- Intervals, hill sprints, and sprints are pace-specific and executed with intent.

Cross Training

- Hyrox and HIIT sessions develop conditioning, work capacity, and sport-specific performance.
